In his show Tokyo Metro, Nate Pagel combines music, video, and still prints to convey his impressions of the Tokyo subway system. Part of a three part series, Tokyo Metro is a visual and audio experience that provokes a sense of movement and excitement in the viewer. Pagel is known for looking beyond representations of public transit as modes of travel, instead employing a painterly and abstract approach to the moving images of these journeys.

Tokyo Metro is an exhibit like no other and should not be missed.
